

ANNOUNCE PLAN OF SANITARY WORK

Board of Health Is Preparing for Unique Census of City.

BASIS FOR A BIG CAMPAIGN

To Commence Second Campaign of Education as Soon as Possible.

(From Saturday's Advertiser.)
Hearing the complete details, President J. S. B. Pratt of the board of health has completed a plan of work for his forces which will keep them busy for the next few months with the best results in the end, these plans including those of a sanitary census, with its preliminary work a systematic sanitary campaign and a campaign of education, the three to follow in the order named.

The actual work under the systematized routine which has been laid down is expected to start the first of next week. Up to the present time, dating from the first of July, when the board of health underwent complete reorganization the work of sanitary and mosquito inspectors and a great deal of the work of the office force has been disorganized. The majority of the inspectors of both squads are green to the work and the district inspectors have been breaking them in. The former chief inspectors have been assigned to important work on other islands and the loss of these to the local staff has been felt.

On top of these handicaps almost two thousand license inspections were suddenly turned over to the board of health under the new laws, and this kept the entire staff busy for the first month, delaying the work of breaking the inspectors into their regular duties. The arrangement of report blanks and the systematization of the license inspection work occupied a great deal of time of the superior officers of the board and the full attention of the board to its normal duties is just becoming possible now.

Preliminary Work.
Meanwhile Doctor Pratt has been carrying on the work preliminary to the sanitary census. This includes the making of the most complete maps of the city which have ever been drawn and on a scale seldom equaled in accuracy. The first instalments of this map, which covers a portion of Kaimuki, were presented to the board of health at its meeting Wednesday.

Every house is drawn to exact scale and every cesspool, or other sanitary utility, is down in its proper place, properly annotated, the physical character of each lot is marked in specified figures and watercourses and other natural features are drawn with painstaking exactness.

The use of the map in reference work are easily appreciated. If a cholera case should occur in any one house in the city, the board's officers would be able to tell at a glance its proximity to streams and without loss of time could draw quarantine lines that would absolutely safeguard the city from further contamination from that particular case. Without the panorama view of the situation afforded by this map, hasty quarantine lines would have to be drawn that might or might not serve the purpose.

For Sanitary Census.

The completion of this map will be followed at once by the sanitary census which Doctor Pratt has long wished to take. The details of this will require the same careful planning as did those of the map and will result similarly. The object of Clean-Up day was to clean the city of its accumulated rubbish; the object of the census the president contemplates will be to give the board complete data on the condition of the city, which is as difficult to arrive at as it is easy to make a general statement as to that condition.

On the data thus gathered and filed the campaign of sanitation will commence with definite objects and moving in well-regulated channels, a marked distinction from the haphazard system of inspection and correction which is the best that can be obtained from the inspection which Honolulu at present shares with a number of other larger cities and which, until now the funds are available, was all that was possible.

Once the sanitary census and the sanitary campaign have been completed, the city will be clean, in the strictest meaning of the word; not clean of its superfluous rubbish only as was the case after Clean-Up day, but with all its nuisances abated and its insanitary spots eradicated. After that the duty of the inspection force will be to keep it clean, and for this work this or any other sanitary force similarly organized is ideally equipped. It is not fitted to clean the city in the first place, except by tedious and unsatisfactory methods.

On Systematic Lines.

Following that campaign, the work of the board of health in Honolulu will be reduced to its most systematic lines and with the necessity of constant supervision on the part of the executive officers done away with, Doctor Pratt hopes to start his campaign of education, to be directed at disease by the education of the people in avoiding and suppressing it, just as, in the same way, the sanitation campaign is aimed at disease by removing its original sources.

The educational work is by far the most important plan that the board of health has yet considered and by the same token is liable to be the most tedious in application, particularly as

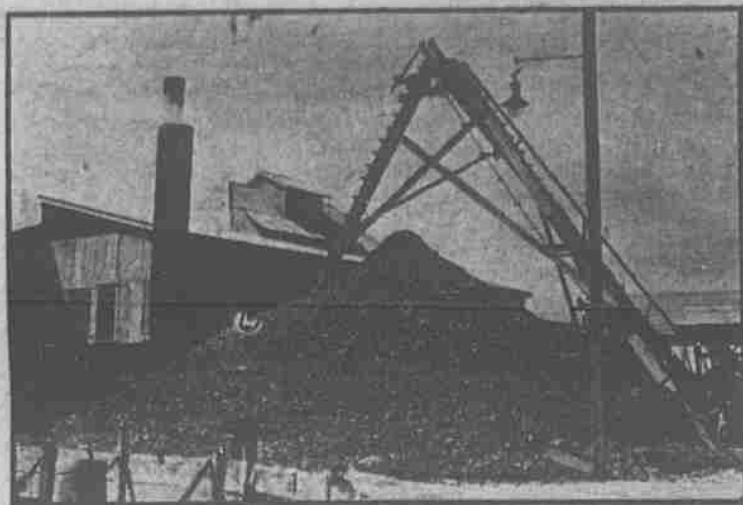

FINAL ORDER TO CLEAN PINEAPPLE DUMPS

What will probably be final orders were issued by the board of health yesterday to the Hawaiian Pineapple Company and others operating in the same section of Twelfth to dispense with what is known as the pineapple dumps, the removal of which has remained a problem since the industry started.

Doctor Pratt has made two suggestions to the pineapple people, one being that they should cart the whole thing to the railroad wharf, dump it on a barge, tow it out to sea and drop it over board in deep water in one of the currents which are known to trend seaward. The other suggestion was that the company should make arrangements with the supervisors to open the old garbage incinerator which the board of health used when it was handling the

CRUSHING PINEAPPLE CORES.

A TWENTY-FOOT PILE OF PINEAPPLE PEELINGS.

garbage, the company to bear part of the expense.

After a week or so had passed without any signs of either suggestion being complied with while the dump continued to grow, Doctor Pratt sent Chief Sanitary Inspector Charles to the company yesterday and not so was served on the latter that it was up to it to do something at once. Charles added the suggestion that crude oil be driven into the pile by hydraulic force, the pile generally covered with the same article and then set fire to. This might not be able to destroy the pile but the board of health, by experience, is sure that it will destroy the flies, which is one of the main objects desired.

President Dole of the Hawaiian Pineapple Company has been sincere in his efforts to solve the problem of this part of the canning business, but as his prime motive is to earn pineapples and so increase the dump the latter has been gaining on him.

COUSIN OF ITO'S ASSASSIN GOES TO A JAPANESE PRISON FOR A LIFE TERM

Penal servitude for life was the sentence passed upon a Korean patriot in Seoul, charged with plotting against the life of General Terauchi, according to reports published yesterday in the local Korean paper, the news exciting much attention among the Honolulu Koreans, among whom the convicted man is well known. The reputed plotter is Ahn Myong Kun, a cousin of the Korean who assassinated Prince Ito at Mukden.

Honolulu Koreans have also received word that nine other patriots have been sent to jail for terms ranging from one to eight years. One of these is Yang Kitak, formerly editor of the vernacular edition of the Korean Daily News,

when the population to be educated is taken into consideration.

It might be added that the sanitary maps are being drawn at the college of Hawaii under the supervision of Commissioner Keller of the sanitation commission, who is taking a public-spirited and whole-hearted interest in the matter of cleaning up the city. The board has placed its leprosy officer on the work also and is utilizing all the spare time of its other employees who are not assigned to regular routine duty, in the same way.

Engineer Wanted.

The vacancy on the board of health caused by the retirement of Dr. W. D. Baldwin, a member, may be filled by the selection of a member who is a qualified engineer, so that the board will at all times have the advice of a competent engineering expert.

The Republican central committee may have this matter brought before it and probably before the Governor is ready to announce the name of the new member the engineering phase of the question will have been thoroughly considered.

An engineer on the board just now seems to be called for. The board has always had two doctors as members, others being business or professional men other than engineers.

The work of the board, particularly under the new laws, has become more and more scientific, and the board, it is agreed, would be materially aided in its labors, if at least one member was qualified to express expert opinions upon questions of drainage, and such.

Doctor Baldwin retired from the board in order that the Governor would not be embarrassed if there was a close decision on the law which says that there shall not be more than two medical members.

AROUND THE WORLD TRIP IN FORTY DAYS

CHERBOURG, France, August 26.—Andre Jaegerschmidt, a Paris journalist, has outdone the wildest dreams of Jules Verne's "Around the World in Eighty Days," by circumnavigating the globe in forty days.

Jaegerschmidt arrived in this city yesterday on the fortieth day of his trip and immediately took a train for Paris, in which city his record-breaking journey originated.

MANY KILLED IN WRECK.

MANCHESTER, New York, August 25.—Twenty-five persons were killed and sixty injured in the wreck of a train near here, caused by defective rails.

PILES CURED IN 6 TO 14 DAYS.
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded.—Made by PARIS MEDICINE CO., Saint Louis U. S. of A.

JUDICIARY BUILDING TENDERS CALLED FOR

Work of Remodeling Will Be a Year's Job—Results Will Justify Expense.

(From Saturday's Advertiser.)
Contractors will be interested to know that the long-expected call for tenders for the reconstruction of the Judiciary building is made today, the notice appearing in another column. These tenders will be received by the superintendent of public works until Monday, October 16.

The tenders desired are for furnishing all labor and material, other than structural steel, for the reconstruction of the building in accordance with the plans and specifications on file at the office of the superintendent in the Capitol. Each tender must be accompanied by a certified check in the sum of five per cent of the total amount of the bid.

Whole Structure Remodeled.

The plans and specifications were completed and returned to the superintendent by the architects, Binyon & Reynolds, yesterday afternoon. Practically they call for the gutting of the entire interior and the remodeling of the whole structure.

The legislature appropriated \$100,000 for the entire work, \$10,000 for furniture and \$5,000 for the moving of the various departments into temporary quarters and back again after the remodeling is finished. Tenders for the structural steel are to be in by October 31. They have been advertised in the United States as well as here and bids for the labor and material other than the steel also will be sought from mainland contractors.

Cook immediately voiced the opposition to it.

"This is outside the fire district to which saloons have been limited," he remarked. "We should stand by our former decision of keeping within those limits."

Full of Blind Pigs.

Commissioner Craig declared that Kankoo is full of blind pigs. "Is it better to have them or go back to the old system?" he asked.

Chairman Brown said he had been told conditions were better there since the saloons were closed and Inspector Fennell bore him out as regards fewer evidences of drinking being seen in public. Behind the scenes, however, square-face seems to be disappearing rapidly.

Yoichi Motojima applied for a saloon license for a building at the corner of Smith and Hotel streets, but was turned down. Attorney E. C. Peters argued strongly in his favor but the commissioners could not see that the saloon was needed.

Does He Represent Chinaman?

John Keahipake had an application in for a license for a saloon at Waihana, but his attorney asked that the matter be deferred as he was unable to attend yesterday to argue for his client.

Mr. Brown remarked that this application had been postponed several times already. He could not see why there should be any further delay. He noted that the application was in the name of a Hawaiian but he said he had been asked by a Chinaman whether the license would be granted. The interest taken by the Celestial appears to point to an Oriental being behind the application in some way. The matter was deferred.

SECOND INFANTRY COMING.

WASHINGTON, August 25.—The third battalion of the Second Infantry was today ordered to Schofield Barracks, Hawaii, September 5.

FEDERAL EXPERT IN HEALTH WORK

Territory to Have Services of Sanitarian Trained in Canal Zone.

(From Saturday's Advertiser.)
Captain Henry Carter, M. D., of the United States Public Health and Marine Hospital Service, who was the right-hand man of Col. William C. Gorgas in the work of cleaning up the Panama Canal zone, has been "lent" by the federal government to the territorial government to aid in the solving of the numerous health and sanitation problems which confront Hawaii. Governor Frear recently wrote to the department of the interior, asking whether Captain Carter would be available for work here. He received a cablegram from Washington yesterday stating that Doctor Carter is ready to start for Honolulu, and he immediately called back asking that the federal expert come right along.

Has High Reputation.

Few men in the federal public health and marine hospital service have a higher reputation than Doctor Carter. It is believed that his services will prove invaluable in connection with the work of the territorial sanitary commission, which is also headed by a Carter, and also in reference to the spending, to the best advantage, of the revolving fund of \$250,000 appropriated by the last legislature for the filling in of insanitary lands.

It is believed that Dr. J. S. B. Pratt, the new president of the board of health, will find Captain Carter of valuable aid in advising as to the manner in which questions now bothering the board should be treated. Especially will his advice be useful in the mosquito campaign, as Captain Carter had no small share in the nine out of ten of the cases of the zone which formerly were yellow fever and malaria traps.

Cost Will Be Limited.

Captain Carter's services will only cost the Territory the actual expenses of his journey here and back to Washington and his traveling and living expenses while in Hawaii. The federal government will pay the expert's salary. It is hoped that he will arrive here by the Sierra, which is due on September 5.

Governor Frear is very enthusiastic over this notable addition to the health force. He thinks the Territory is decidedly lucky in being able to secure the services of Doctor Carter.

WHERE ONE UNION BLOCKS ANOTHER

HOUSTON, Texas, August 12.—A difficult situation has arisen within the ranks of the Farmers' Union of Texas when they found organized labor of the Nation was against their plan of securing convict-operated rope factories in Texas to increase the consumption of cotton.

This scheme has long been cherished by the Farmer's Union to promote the use of Texas cotton, which they hoped would cause an increase in price. It was proposed to place the factory near Houston in place of the dismantled convict iron plant at Rusk. The matter had gotten so far as the legislature when organized labor stepped in and placed thumbs down on the project.

At a recent meeting at Fort Worth, W. H. Wisner of New York, president of the United Garment Workers of America, voiced the protest of organized labor against the proposed venture, apprising the Farmers' Union of an ethical oversight. In consequence, if a rope factory be established near Houston it will be manned by union labor and not by convicts.

CONFESSES TO MURDER OF FATHER AND MOTHER

BOONVILLE, Indiana, August 26.—William Lee confessed yesterday that he had killed his father, Richard Lee, but adds that it was in self-defense, after the murder of his mother and younger brother.

Officers spirited the young man from here in an automobile and placed him in safety in the jail at Evansville, to prevent his being lynched.

BAKER SENDS FOR MORE HAWAIIAN PICTURES

Ray Stannard Baker, part proprietor and chief contributor to the American Magazine, has written to Alexander Hume Ford, stating that the series of Hawaiian articles will begin in the American Magazine as soon as the necessary photos arrive, and expressing a hope that they have been shipped, as the articles are ready for the pictures. The pictures originally requested have now reached New York, but Baker now asks for another batch of local views and a series of the Outrigger Club, as well as surfing pictures. Baker writes that he intends to give the Outrigger Club some space, and it is needless to say that the editor of the Mid-Pacific Magazine is deluging Brother-Editor Baker with the Outrigger pictures at least.

ERROR PROVES HOW ADVERTISER ADS TELL

H. Hackfeld & Co. advertised New Sellers in yesterday morning's paper. By a typographical error the price was made to read \$1 per case of 100 bottles instead of \$10 per case.

As a result of this error Hackfeld & Co. were besieged with orders all through the day.

New Sellers is easily worth \$10 a case, so it is expected that orders will continue just as briskly at the corrected price.

UNION DEMANDS MAY TIE UP LINES

General Strike on Harriman Railroads Threatened by Employees.

PREPARATIONS FOR FIGHT

Recognition of the Federation of Unions Will Be Insisted On.

SAN FRANCISCO, August 26.—There is every indication that a great strike of railroad employees is impending and may spread over the entire Harriman system. Twenty per cent of the employees in the local railroad shops are inactive at this time.

President Requin, of the San Francisco branch of the machinists' union, declared yesterday that he expects a practically unanimous vote by the members of the organization in favor of a general strike, unless concessions are made.

Union Demands.

The union men are demanding the recognition of their federation of affiliated organizations, a working day of eight hours and an increase in wages. The principal demand fixed upon by the unions is that of recognition of the federation on rather than of the individual unions.

It is stated here in railway circles that preparations are being made by railway officials for a long and bitter fight against the unions.

Must Recognize Federation.

KANSAS CITY, Missouri, August 26.—President Ryan, of the Brotherhood of Railway Carmen, in a statement yesterday, asserts that at the conference with representatives of the Harriman system next week in this city the recognition of the federation will be insisted upon.

President Ryan charges the railroads with playing the individual unions against one another in the interests of the corporation.

Vote in Favor of Strike.

PADUCAH, Kentucky, August 26.—Ninety-seven per cent of the employees of the Illinois Central railroad, who are affiliated with the federation of unions, have voted to go on strike, unless the company recognizes the federation.

It has been decided that the recognition of the individual unions in the various railroad shops will no longer be satisfactory.

RINGLEADER SAYS GENERALS PLOTTED NEW REVOLUTION

MEXICO CITY, August 26.—The police are reported to have discovered a revolutionary plot, with its headquarters in this city, for the overthrow of the provisional government and of the Madero forces.

Andres Enriquez, charged with being the ringleader, has been arrested and he names Emilio Gomez and Generals Bonilla and Orozco, the right-hand men of General Madero during the recent revolution, and General Emiliano Zapata as principals.

General Zapata was recently defeated in the State of Morelos by General Madero, but the other generals named deny in the most emphatic manner that they have plotted for the overthrow of the government.

ATWOOD FINISHES RECORD AIR TRIP

NEW YORK, August 26.—Harry N. Atwood reached Governors Island yesterday, establishing a record for the longest aeroplane flight yet attempted. His trip covered 1,365 miles.

Atwood after his arrival stated that trying to break records in aviation was getting to be too risky, and indicated that he would probably retire from the field as an aviator.

He was twenty-eight hours and thirty-one minutes within the twelve days that he had set as his mark. He made twenty stops on the journey. The flight was made for a prize of \$10,000 offered by Victor J. Evans, an attorney of Washington.

CHAMPION RIFLE SHOT.

CAMP PERRY, Ohio, August 26.—Sergeant King, of the Fifty-third Iowa National Guard, is winner of the military rifle championship of the United States, defeating all the best marksmen at the range here.

ANTISEPTIC LINIMENT.

Cuts and bruises may be healed in about one-third the time required by the usual treatment by applying Chamberlain's Pain Balm. It is an antiseptic and causes such injuries to heal without maturation. This liniment also relieves soreness of the muscles and rheumatic pains. For sale by all dealers. Deussen, Smith & Co., Ltd., Agents for Hawaii.
